

packing simplicity

REXCARE Pack System *Fully integrated medication packing system. Tap and Pack - It's that easy!*

FULL INTEGRATION

Using the Rex Dispensing System, you can dispense to your patients as normal, and then select which prescriptions you would like to add to your pack. This means you don't have to re-enter anything - It's all in a single integrated database!

STAND ALONE

If you are using a dispensary other than Rex, then you can enter patients and prescriptions directly into the RexCare easy to use entry screens.

IF YOU HAVEN'T GOT REX:

If you haven't got the Rex Dispensing System, you may be able to use RexCare with your existing software. Simple call us to see if your system is compatible.

FULLY SUPPORTED

Your RexCare system comes with a fully support scheme. If you require any assistance when using RexCare, simply call the RexAssist Help Desk. This telephone, fax and email based service is available from 9am to 9pm, 7 days a week, 365 days a year!

If you require assistance in your pharmacy, or at an institution, our on-site technicians are available to you. Our Quality Care Accredited trainers are also on hand if you should need an on-site training session.

UNLIMITED PACKTYPES

If you are using the Douglas Medico systems, then your RexCare system is ready to go. If you would like to use any other packing system, use the maintenance system to set-up practically any system with RexCare. This also means if your preferred pack system changes, so can RexCare!

WINDOWS & TOUCH SCREEN

RexCare is completely Windows based, and uses the Power and Speed of a full SQL or Access Database. To get even more speed, team your RexCare system up with a Touch Screen. Once you have selected the script to pack, simply tap the screen in the places where the particular drug is to be placed. Easy!
